

Toledo Regional Chamber of Commerce Electricity Participation Agreement

On May 13, 2009, there was an auction for wholesale power supplies that established the prices FirstEnergy electric distribution utilities like Toledo Edison will charge for electricity beginning June 2009 through May 2011.

To secure savings through third party power supplies, consumption and demand information must be obtained in order to secure pricing proposals from various potential suppliers. Since Palmer Energy will be relying on this information to bid out for supplies and buy power supplies for you and other consumers, if your consumption or demand will vary by more than 10% ignoring weather variations please inform us so that variation can be accommodated.

There are no guarantees that the pricing available to the group will provide savings compared to the auction price. A transaction will not be executed if savings are not available. However, if savings are available, signing this Agreement authorizes Palmer Energy Company to sign an agreement on your behalf as your agent or power of attorney for power supplies using the consumption and demand information used in the bid process. Palmer Energy will provide a copy of this agreement to you after execution for your records.

You understand that your consumption may be grouped with other electric consumers. Since the savings available under this program are unknown, Palmer Energy Company will estimate the per kWh savings you would see without any fee and add a fee on to the supplier price that shall not exceed 20% of that savings.

To participate in this program for the obtained savings period, please sign below and include your **customer number(s)**. *The customer number is found on page 3 of your Toledo Edison invoice under the section "Charges from Toledo Edison this Billing Period."*

I authorize Palmer Energy Company to include my facility(s) in their Electricity Purchasing Program.
